

MUSEUM
DER KULTUREN BASEL

Guided Tour

October 23, 2016, 11.00 a.m. - 12.00 noon

How is it done? The yarn is dyed in different colours and, when woven, the cloth suddenly features an array of different figures and patterns! The technique of ikat weaving is highly developed, especially in Eastern Indonesia and Timor-Leste. Come and get to know some of the old as well as new examples of this fascinating textile art and learn about the mode of production, the designs and the impact the cloths have.

With Richard Kunz and Willemijn de Jong
curator and co-curator of the exhibition Striking Patterns
