DEMONSTRATION WORKSHOP

Restoration work from close-up

28 September 2022, 15.00–17.00 Uhr | Admission fee

Here the seams have come unstitched, there you have paint peeling off, and occasionally pieces are all what is left of objects. In their work on the collections, our conservators have to deal with all kinds of fragments. What do they piece together, what is left in bits, and why? In the exhibition "Fragments" you get the chance to look over their shoulder and learn about their work.
