

Grasping anthropology – Lecture and gallery talk

**PICTORIAL WORLDS – CANCELLED**

3 February 2021, 18:00 - 19:30 PM

Photo albums capture memories – of special events such as distant journeys abroad, of memorable family gatherings, or of close and beloved people. At the same time, photo albums also have the ability to disclose social realities, modes of economic production, and visual conventions. We juxtapose historical photographs with contemporary images and compare the works of African and European photographers, thus bringing to light different perspectives of the “Self” and the “Other”.

With curator Alexander Brust
